

WHAT IS CLAIMED IS:

1. A bag slitting apparatus for opening a sealed bag along an edge of said bag, the apparatus comprising a first arm having a first outer surface and a first inner surface, a second arm having a second outer surface and a second inner surface, wherein said first and second arms are in tensioned movable opposed relationship to each other such that the first and second inner surfaces are movably positionable against each other and wherein one of said inner surfaces is a bladed inner surface having projecting therefrom a bag cutting blade with a distal blade tip and wherein the other of said inner surfaces has a blade tip receiver, and additionally wherein the first and second outer surfaces are concavely contoured for simultaneous opposing receipt of a finger and thumb of a user.

2. A bag slitting apparatus as claimed in Claim 1 wherein said apparatus is fabricated as a single piece of material.

3. A bag slitting apparatus as claimed in Claim 2 wherein the single piece of material is a rigid plastic.

4. A bag slitting apparatus as claimed in Claim 1 wherein said apparatus except for the bag cutting blade is fabricated as a single piece of material.

5. A bag slitting apparatus as claimed in Claim 4 wherein the bag cutting blade is metal.

6. A bag slitting apparatus as claimed in Claim 1 wherein the blade tip receiver is a surface-disposed groove in alignment with the blade tip.
